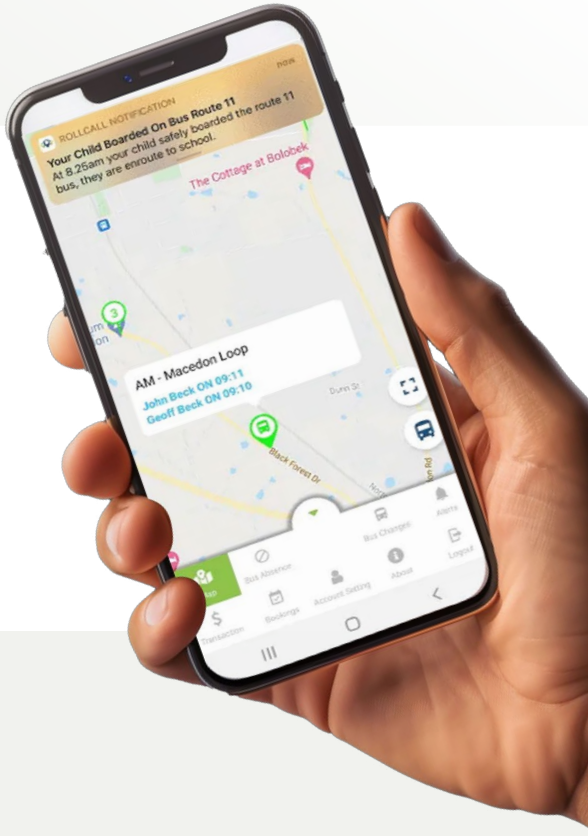
RollCall

Making school journeys

Safer and Smarter



RollCall is a purpose-built school transport management platform designed to make student travel safer, smarter, and more efficient. Our mission is simple: to ensure every student's journey to and from school is tracked, transparent, and secure.

Gone are the days of paper manifests, manual processes, and uncertainty about where buses are or whether students are safely on board. RollCall gives schools, parents, and drivers full visibility in real-time, from the moment a student boards the bus.

What RollCall Delivers:

1.

Safety:

Know exactly which students are on which bus, at any given time. Parents and schools receive real-time updates on student movements.

2.

Efficiency:

Manage routes, stops, and bookings with ease. Our Smart Route tool simplifies bus planning whilst our data analytics support informed decision making.

3.

Transparency:

Drivers, school staff, and parents all have access to accurate, live information - reducing confusion and missed communications.

How It Works – Simple and Seamless:

Students

Scan on and off the bus using NFC tags and a RollCall scanning device.

Drivers

Use the RollCall mobile app to view their passenger manifest and route stops.

Schools

Manage the entire bus network from a web-based portal - adjusting stops, reviewing trips, and ensuring compliance.

Parents

Access a mobile app to track the bus in real-time, receive notifications, and know when their child is safely on board or has arrived.

RollCall is designed to enhance student safety, reduce administrative burden, and improve communication between schools, bus operators, and families. It's reliable, secure, and built specifically for the unique needs of school transport.

Your Student's Safety and Your Peace of Mind

Safety is non-negotiable. RollCall takes the guesswork out of school transport, making it easier for parents, schools, and bus drivers to focus on what matters: your child's safety. With RollCall, everyone is in the loop, and every trip is one you can trust.
